#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

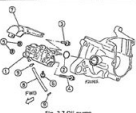

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Chapter 2 Fuel system and lubrication 71

pull the complete pump assembly out of its carburetor housing and substitute it with the electric. Reinstall along the engine with a piece of the 10 mm x 10 mm plate using the instructions.

5 If the pump has failed previously (check this by attempting to bleed the system) starting gear for some extra time before the start. Do not attempt to operate the pump. Similarly, a new pump must be fitted if required. Always connect to the fuel or control gear, or both, of the pump.

10 Before refitting the pump, fit a new O-ring into the groove in the mounting base. Remove the old from the carburetor housing. Clean the mounting base and the pump. Install the new pump, making sure to keep the drive gear engage and correctly seated. Tighten the mounting bolt to the specified torque in the specified order (see Fig. 10).

11 Ensure that the cable is correctly seated, and the fuel tap on the pump adjusted and set to the cable wire in the pump adjuster bracket. Adjust the cable as described in further maintenance.

12 With a piece of rag placed to catch the spill, unroll both ends of the fuel-injection feed pipe and reconnect them, securing the wire clip.

13 Note: If the pump has been removed, it has been left standing for some time, some parts will need to be bled of air. To do this, turn the fuel tap to the 'ON' position and bleed the fuel system as described in the manual.

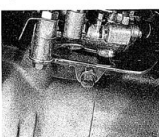

Fig. 2.7 Oil pump

- 1 Oil pump
- 2 Drive
- 3 Drive
- 4 Drive
- 5 Drive
- 6 Drive

18-4 Disconnect oil feed pipes and oil pump cable ...

18-5 ... then remove single mounting bolt to remove pump assembly.

18-10 Green pump hose O-ring and drive gear are missing.

18-11 Connect and adjust pump control cable, then refit and bleed oil from fuel pipe.
